Profile

Cybersecurity professional with a Master's degree in Cybersecurity and hands-on experience in IT audit, risk, and compliance. I have led security audits for a major national telecom operator and managed security and compliance for a national financial platform built for/with BEAC and CNEF Cameroon. My work covers three areas: security operations (SOC, firewalls, incident response), security testing (penetration testing and web application security), and IT governance (ISO 27001, NIST, COBIT). I write clear reports, explain security to non-technical teams, and help organizations protect sensitive financial and personal data.

Technical Skills

IT Governance & Compliance: ISO 27001, GRC, IT governance; working knowledge of COBIT, NIST, and SOX concepts; PII / data-protection compliance.

IT Audit & Risk: IT risk assessment, IT general controls (ITGC) testing, information security auditing, non-conformity reports, remediation tracking and follow-up.

Security Operations: SOC / SIEM design, firewalls (Fortinet FortiGate / NGFW), hardening, threat monitoring, incident response, forensics (Volatility, Autopsy).

Security Testing: Internal/external penetration tests, web application security, social engineering, OSINT · Burp Suite, Nmap, Metasploit, Hydra, Wireshark.

Networks & Systems: Network security, TCP/IP · Linux (Kali), Windows, macOS · cloud computing basics · SQL, database security review, MongoDB (NoSQL).

Data, Automation & Reporting: Data analytics for audit, scripting (Python, Bash), automation (n8n / LLM workflows), Microsoft Office Suite, report writing.

Professional Experience

InfoPro Solutions LLC | Cybersecurity Technician (Cybersecurity Engineer)

November 2025 – March 2026, Yaoundé, Cameroon

- Planned and led full IT audits of servers, network equipment (Router), and web applications for a major national telecom operator (Camtel): mapped the information system, tested controls, and identified critical vulnerabilities and produced a detailed, structured pen-testing report with severity scoring, CVE mapping, and actionable remediation recommendations.
- Wrote a non-conformity audit report with clear findings and a prioritized remediation roadmap, and followed up on the corrective actions.
- Led the cybersecurity team across internal projects and external client engagements, overseeing security assessments, penetration testing activities, and delivery of cybersecurity consulting services.
- Led security, compliance, and quality assurance for **Trace-Fin**, a national-level platform developed by IPS for BEAC and CNEF Cameroon: implemented controls for the protection of personal (PII) and sensitive financial data, conducted access reviews, established security and compliance procedures, and ensured overall security and quality standards across the project.

ANTIC (National CIRT Department) | Cybersecurity Intern (Security Assessment)

March 2025 – June 2025, Yaoundé, Cameroon

- Reviewed system configurations and access controls, recommended risk mitigations, and produced a full technical audit report presented to the security team in writing and orally.
- Developed a **Roundcube mail server extension** enabling **end-to-end email encryption using OpenPGP**, enhancing the confidentiality and security of email communications while integrating encryption capabilities directly into the existing webmail platform.

- Built a centralized platform to monitor and track **SSL/TLS certificates** issued by **ANTIC** for client organizations, enabling proactive certificate lifecycle management, expiration monitoring, and efficient follow-up with clients.

Next Script LTD | AI Automation Engineer

February 2026 – Present, London, UK (Remote)

- Built automation pipelines using **n8n, scripting, and LLM workflows** to streamline the end-to-end creation of new courses, including course content, assignments, practical exercises, quizzes, and supporting files such as **Jupyter Notebooks (.ipynb)** for hands-on exercises, significantly improving content creation efficiency and consistency.
- Integrated the automated course-generation pipeline into the company's learning platform, enabling seamless interaction between the automation workflows and the platform to simplify and accelerate the course creation process.
- Led and coordinated the team by assigning, tracking, and following up on tasks and deliverables using **Zoho projects**, ensuring clear accountability, timely execution, and alignment with project objectives.

Blacks In Technology Foundation (BIT) | Programs and Partnership Committee

January 2026 – Present, USA (Remote)

- Contributed to the planning and execution of technology-focused programs and initiatives designed to support and empower Black professionals in the technology sector.
- Supported the development and management of partnerships with organizations, companies, and community stakeholders to expand program reach and impact.
- Collaborated with committee members to coordinate events, workshops, mentorship initiatives, and other community-driven programs.
- Assisted in identifying partnership, sponsorship, and collaboration opportunities while supporting stakeholder engagement and relationship management.
- Contributed to program strategy, execution, and continuous improvement to strengthen community engagement and overall program impact.

IUEs/INSAM | Part-Time Lecturer, Computer Engineering

September 2025 – March 2026, Bafoussam, Cameroon

- Teach **cybersecurity, databases, and software engineering** to 104 Bachelor's and Master's students, including a dedicated Master's-level cybersecurity cohort, delivering both theoretical instruction and practical, hands-on learning.
- Develop **structured course materials, practical exercises, assignments, and assessments**, and evaluate student work while providing clear feedback strengthening skills in technical communication, reporting, leadership, and mentoring.

QuickDo Sarl | Full Stack Software Developer

January 2021 – March 2022, Bafoussam, Cameroon

- Designed and developed production-grade **web applications and REST APIs** using **Angular, Next.js, Django, and MongoDB**, delivering scalable solutions aligned with business and client requirements.
- Implemented and maintained **CI/CD pipelines**, while applying strong knowledge of application architecture and database internals to improve development workflows and contribute to **secure-by-design application and database reviews**.

Certifications

Fortinet FortiGate 7.6 Operator | Fortinet (Dec 2025)

Ethical Hacking Essentials (EHE) | EC-Council (Oct 2024)

Google Cybersecurity Professional Certificate | Google / Coursera (Jun 2024)

API Authentication & Security (Feb 2026)
Certified Red Team Analyst | CWL (in progress)
CompTIA Security+ | CompTIA (in progress)

Education

Centre for Cybersecurity and Mathematical Cryptology, University of Bamenda · 2023 – 2025 **Master Degree in Cybersecurity**

- ISO 27001 · GRC · IAM · Ethical Hacking · Digital Forensics · Secure Software Development · Cloud Computing · Cryptography

IUT Fotso Victor, University of Dschang · 2020 – 2021 | Bachelor of Technology, Computer Science & Networks

- SIG · Advanced Network · Advanced databases · Java OOP · Cloud Computing · Cryptography

IUT Fotso Victor, University of Dschang · 2018 – 2020 | Diploma of Software Engineering (DUT)

- IOT · Introduction to software Engineering · Information System · Database · programing · Entrepreneurship · Mathematics · Ethics
